Description

It is often suggested that economics is the study of peoples' efforts to satisfy their unlimited wants by utilizing their limited resources. Economics studies the cost implications of an individual making a decision to go to college, the cost implications of a society making a decision to go to war, and everything in-between. The Economics Transfer Pathway provides a broad base of general education relevant to economics careers, and prepares students for transfer into an Economics baccalaureate degree at Minnesota State universities. A bachelor's degree in economics will open doors into a number of career fields including management, public administration, public policy, banking, education, and business. It may also be a step to advanced degrees in many fields.

Outcomes

By completing this program, students will achieve the following learning outcomes:

- Ask an economic question, gather information and resources, form an explanatory hypothesis, collect data that can be used to test the hypothesis, analyze the data, draw conclusions, and suggest future research;
- Work with mathematical formalizations of economic models and perform mathematical operations; explain the design and results of laboratory and field experiments; and explain the conduct, results, and limitations of basic econometrics;
- Explain economic models as deliberate simplifications of reality that economists create to think through complex, nondeterministic behaviors; identify the assumptions and limitations of each model and their potential impacts;
- Explain the strengths and limitations of economic data and statistical analyses; think creatively and combine or synthesize existing economic ideas in original ways; and
- Demonstrate knowledge of major economic institutions and familiarity with magnitudes of common economic statistics.

Pre-Program Requirements

Some courses may require appropriate test scores or completion of basic math, basic English and/or reading courses with a "C" or better. CLC utilizes a multiple measure approach for placement which may include high school MCA, SAT, ACT scores in addition to high school GPAs. For insurance purposes, internships may require that students be 18 years old.

Graduation Requirements

- These requirements apply to new students, and students who have been absent from this college one academic year or longer.
- At least one semester before you plan to graduate, complete an Application to Graduate.
- A total of 60 college level credits with a cumulative GPA of 2.0 or higher are required for an Associate of Arts Degree.
- A cumulative GPA of 2.0 or higher in all Minnesota Transfer Curriculum courses is required to complete the MnTC.
- 15 credits must be earned at Central Lakes College to be eligible for an Associate of Arts Degree.
- Classes may meet requirements for more than one goal area, but credit will not be awarded for any course twice.

Career & Transfer

The Economics Transfer Pathway A.A. Degree offers students a powerful option: the opportunity to complete an Associate of Arts degree with course credits that directly transfer to designated Economics bachelor's degree programs at Minnesota State universities. The curriculum has been specifically designed so students completing this pathway degree and transferring to a Minnesota State university may enter with junior-year status. Courses in the Economics Transfer Pathway associates degree will directly transfer and apply to the designated bachelor's degree programs. Students should consult with an advisor for guidance regarding how to best meet the requirements of their intended baccalaureate program. Universities within the Minnesota State system participating in the Economics Transfer Pathway include:

- Bemidji State University BS
- Metropolitan State University BS
- Minnesota State University, Mankato BS
- Minnesota State University, Moorhead BA
- St. Cloud State University BA
- Winona State University BA
